

COMSATS University Islamabad, Abbottabad Campus

Department of Computer Science

Spring 2026

Class: BSE 6A and 6B

Subject: Software Design and Architecture

Assignment 3

CLO Mapping

CLO-3

Course Learning Outcome

Compare different software architectures and their processes.

Taxonomy Learning Level

Analyzing

Question:

Analyze the detailed Software Architectures of the NADRA software system and the Software system used by the FEDEX international. The analysis should include the detailed diagrammatic as well as component level details of the systems. Compare and Contrast the different Architectural styles used by both the applications and represent your findings in a comparative summary.

Guidelines:

- You may do the assignments in a group of Maximum three students.
- Each group should make one submission online.
- The names and registration number of all group members must be clearly mentioned in the title page. The excuse of forgetfulness will not be considered.
- The report should be well formatted and professional.
- No credit will be given for copied/late assignments.

Deadline: 5th July 2026
